A The anti-polar ring (N = 17)
ssive junction
ın measured here
B Open and folded, from a real trajectory
OPEN Rg = 2.70
FOLDED Rg = 1.50
active (drives CCW)
active_rev (drives CW)
passive junction
the same run, 207 s apart — open Rg ≈ N/2π = 2.71, folded ≈ N/4π = 1.35
